Bread Crumbs/ Panko Process Line

Bread crumb is commonly used for the products that need fried, crisp outside and meltingly soft inside. Replacing the traditional production technology. SinoPuff bread crumb production line is effective with less waste materials. Through mixing, cooking, crushing and screening, this production line can make various shapes of bread crumbs such as Japanese long needle shape, US granular shape, snowflake shape and so on.

Production Process Line

Mixer Twin Screw Extruder → Automatic Feeder Cutter → Conveyor → Pulverizer → Z-Shape Conveyor > Crumbs Sieve → Dryer(Extended).
